Sir:

AMENDMENT

In the Claims

Please amend claim 1 to read as follows:

C1

1. An archery bow including bow speed specific sight pin openings for sight pins located therein relative to each other at distances selected so that each sight pin opening indicates a specific arrow flight range for a given bow speed, and wherein when a single sight pin is manually positioned to indicate its specific arrow flight range for the given bow speed, each of the other sight pins in the other openings will be in position to indicate their specific arrow flight range, without any need to manually position such other sight pins in their openings.
